

GMI's latest gas detector in the Personal Surveyor range has just got more personal!

# PS200 Series

PS200 Series

GMI is pleased to announce the launch of its new Personal Surveyor (PS200 Series) product range and full Auto Bump & Calibration Station.

This latest offering from GMI is based on extensive customer research into the confined space and safety equipment markets.

The PS200 is robust, easy to use, compact and can detect LEL, Oz, CO and H<sub>2</sub>S. With any combination of these four gases, the PS200 can be completely configured to end-user requirements to provide single or multiple gas detection. The instrument has excellent audible, visual and vibrating alarms as well as a motion alert sensor. The PS200 can be supplied with an internal pump or alternatively as a diffusion instrument.

## Features

Red display in alarm conditions

Configurable calibration options

Configurable bump options

With IECEx, ATEX and MED (module B & E) certification, the new PS200 gas detector has been designed to meet and exceed industry approved safety and confined space requirements. (UL 913 Class 1 DIV 1 Groups A, B, C, D and CSA approvals are pending).

**Should you have any query, please do not hesitate to contact us for more information about the product.**
